Reminder: New CLHIN Login Information

As explained in last month’s eNewsletter, there are new changes to the Briscoe Library website which will affect the way all of our CLHIN users log into their library accounts. The information contained in the June eNewsletter will enable you to navigate the new login screens.

*It is important that all of you perform these new login procedures as soon as possible in order to avoid any possible delays at the time you need this information service. Many questions can be answered and problems resolved in advance of any unforeseen delays. Please, take a little time to avoid problems later on.*

If by chance you did not receive the June eNewsletter, please click this [LINK](mailto:CLHIN@uthscsa.edu) to view the new login instructions. Everyone has been issued a new Library ID Number. If you have not received yours, please contact us. If you have any questions, please contact us as soon as possible by responding to this email, or use any of the other contact methods incorporated in this newsletter.

Additionally, we would encourage all of our CLHIN users to be aware that you may discover links on our website which no longer function because of re-routing of various information. If you should encounter these non-active links, simply notify us and we will gladly re-direct you. With your help, this time of change will be most beneficial to all.

Briscoe Outreach Participates in 2012 Summer Institutes

The Outreach Services Program of the Briscoe Library participated in the 2012 Summer Institutes on Evidence-Based Quality Improvement. The conference/exhibit was presented by The University of Texas Health Science Center at the Grand Hyatt Hotel, in downtown San Antonio, Texas. The entire program ran from July 17th - 21st and the Library Services Outreach was present on the 19th & 20th.

The Summer Institutes Program brought together over 500 clinicians, nurses, physicians, healthcare educators, leaders and researchers from across the nation and foreign countries as well. All were focused on a unified goal of sharing information concerning their own research and availability, while learning about other advancements in improving patient healthcare and safety.

The Briscoe Library Outreach Services used this opportunity to present information on PubMed, MedlinePlus, WISER and other National Library of Medicine online products which enable health professionals and consumers to access dependable and current information associated with quality patient care.
